RE: Southwest Hazard Control Inc.

To Whom It May Concern:

It is with a great deal of pleasure that I offer the following endorsement of Southwest Hazard Control Inc. (SHC). I have worked with SHC for over 20 years, while employed with three organizations including: Pima Community College, Honeywell and now Ventana Medical Systems. During that period, the one thing that has always remained consistent has been SHC overriding consideration for its customers, regarding environmental compliance, effective economic solutions and safety of the job sites.

SHC has distinguished its company as a leader of environmental services in the Southwest. The SHC management team and staff offer knowledge and expertise in all of SHC's environmental services. Over the years, I have been a recipient of many of their services, including: Hazmat Mat Emergency Response, Hazardous Material Remediation, Mercury Remediation, Asbestos and Lead Remediation, Mold Remediation, Confined Space Entry, and Indoor Air Quality testing. SHC consistently provided me with accurate, efficient, and cost effective solutions.

It is for these reasons and many more that I give my highest recommendation to SHC. They have proven themselves as a great business partner and a valuable asset to today's complicated environmental issues. Please feel free to call me if you have any questions.

Sincerely,

Scott C. Harper  
Sr. Engineer  
Safety, Health, Environmental Dept.
