To Whom It May Concern,

D&H Construction has worked with the Southwest Hazard Control (SHC) team for 15 years. In those 15 years, I have learned a lot about SHC and the way they operate as an organization.

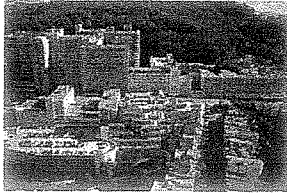

SHC has high service levels and a really high attention to detail. They have done small projects and large complex projects for D&H, and I have found them to be first class in all regards. They work with urgency and the utmost safety. Mike Hegarty and Rico Alfonso always manage their teams with the project in mind. They always ensure that the project finishes on time and on budget, even when working within tight constraints that are prevalent in the Bay Area.

SHC is a shining example of how true partnership works in business, one thing about them that stands out for is their communication. When I call, I don't go through various voice options; instead, I go direct to a person. What a difference that makes on saving time. I would highly recommend them for any size of project.

Sincerely,

To Whom It May Concern,

I am writing on behalf of Southwest Hazard Control.

Southwest Hazard has been providing abatement services here at the UCSF Medical Center for many years. Their dedication and professionalism are first rate.

We are a Medical Facility with over 200 Intensive Care Beds, 28 Operating Rooms, and we are, in addition, one of the busiest transplant centers in the United States. As we are an aging facility, our needs for Hazard Control services are numerous and varied and we almost always require an immediate response.

Southwest Hazard Control has always provided the demanding service we require to keep our facility operating in a safe and efficient manner.

I most heartily recommend their services.

Please do not hesitate to call me at anytime for any additional information I can provide.

Thank you.
